About Heat Trace

For over 40 years Heat Trace has been providing heat tracing solutions all over the world and we think we're the best at what we do.

Heat Tracing is a cable based system used to maintain or raise the temperature of pipes and surfaces usually to enable the efficient and safe processing of liquids and gases.

For example, Heat Trace cable has heated pipelines at the bottom of the North Sea, has melted the snow in Red Square, has stopped the pipes freezing in the Houses of Parliament, and has ensured that Usain Bolt had piping hot water in his bathroom.

Awards Won

Apprentice Employer of the Year

In 2015 Heat Trace was runner up in the North West for the Apprentice Employer of the year awards. These awards are run by the National Apprenticeship Service (NAS) and are the most prestigious apprenticeship awards in the UK.

In 2016 Heat Trace was included in NAS's top 100 UK apprentice employers.

Heat Trace Apprentices win awards!

In 2014 Joe Robinson won two prestigious awards; Most Improved Apprentice in the North West of England from the Institute of Mechanical Engineers and Apprentice of the Year from Mid-Cheshire FE College.

In 2015 Mike Gibbons was awarded Higher Apprentice of the Year from Mid-Cheshire FE College.

The awards recognise the progress that Joe and Mike have made since commencing their apprenticeships.

Queen's Award for Innovation 2014

We are winners of a Queen's Award for Enterprise – the UK's highest accolade for business success. We received our award in the Innovation category. This award is in recognition of our innovation and continuing development in the field of semi-conductive polymer heating elements, or self-regulating heating cables.

We offer Engineering & Business Apprenticeships

Why Heat Trace?

Cheshire based Manufacturer with Global sales

Friendly working atmosphere

Training at no cost to you

Progress faster than at university

Successful growing company

What's great about our programs?

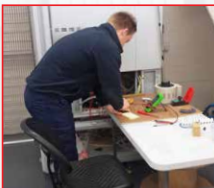

Varied & Rewarding Schemes

100% record of Apprentices securing permanent roles

Apprentices fully involved in shaping their future

Strong commitment to further Qualifications
beyond Apprenticeship

Regular personal catch-up meetings to check progress
